

第 4 届中国智能交通年会 4th Chinese Annual Meeting on ITS

September 26-27, 2008,
Qingdao, China

Theme: A Safe and Convenient Travelling

The Chinese Annual Meeting on Intelligent Transport Systems is designed to demonstrate the latest ITS development and achievements in China and to create a vital and sustainable environment for the Chinese ITS community. The Annual Meeting provides a national-wide platform to exchange ideas about ITS policies, newest research results, deployment experience and advanced technologies among the authorities, industries and academia.

Currently, the Chinese economic development is transforming into a stage emphasizing on advanced technology, sustainability and societal harmony. In this background, safety, convenience and sustainability will be the major directions and goals of future transportation development. This Annual Meeting will focus on transportation safety with the theme "A safe and Convenient Traveling". Decision-makers and experts will gather together to discuss policies, planning, implementation, development trends and technologies during the Annual Meeting. International speakers will be invited to give an update of ITS development in the world.
