

# ITS New Zealand May 24 Asia Pacific Update

# ITS NZ continues to growing membership across the whole supply chain

# ITSNZ Activity in 23/24

- **Convened Industry Working Group on C-ITS for NZ**
- **Submission on Government's Transport Policy Initiatives**
- **Seminar on Data Analytics for Road Safety**
- **Study Tour – The Technology and Systems Supporting City Rail Link**
- **Partner with MoT for the Transport Knowledge Hub**

# The New Government's Priorities are pointing to Increases in ITS Investment

- Time of Use and Congestion Charging
- More Tolling
- Electronic Road User Charging
- National Public Transport Ticking System
- Tidal Flow Systems to maximise the use of existing infrastructure
- Connected and Electric Public Transport
- Integrating Auckland's new City Rail System into Auckland's traffic system
- On-Demand Public Transport
- Next Generation Camera Enforcement

# **These initiatives provide opportunities for members to demonstrate leadership**

- **How can the increased amount of data being gathered be used to provide even better outcomes?**
- **Improving road safety without blanket speed reductions**
- **What are the opportunities for further integration? And what extra benefits can be achieved?**
- **There are still more areas of transport technology to explore**
  - **Wider implementation of Connected and Co-operative ITS**
  - **Making infrastructure smarter to improve safety, enhance resilience and reduce maintenance costs**

**NEW ZEALAND'S FUTURE TRANSPORT CONFERENCE**

**25-26 JUNE, AUCKLAND**

**t - TECH 2024**
